CLAIMS

2 We claim:

3 *Sub* 1. A device for data representation, comprising:

4 (A) a reference grid;
5 (B) a first object frame, within said reference grid;
6 (C) a first object associated to said first object frame.

7 2. A device for data representation, as recited in claim 1, wherein said first object is
8 associated with a cardiovascular function.

9 3. A device for data representation, as recited in claim 1, wherein said first object
10 has a generally cylindrical shape.

11 4. A device for data representation, as recited in claim 1, further comprising a
12 numeric value associated with said first object.

13 5. A device for data representation, as recited in claim 1, further comprising a
14 second object frame placed within said reference grid.

15 6. A device for data representation, as recited in claim 5, further comprising a
16 second object associated with said second object frame.

17 7. A device for data representation, as recited in claim 5, further comprising a sloped
18 region positioned between said first object and said second object.
